PUBLISHED v2 (2026-10-18) — published on lixtara.com by owner decision before attorney review; decisions made without counsel are listed in the memo (docs/legal/2026-10-18-textos-v2-memo.md)

Cookie Policy

Last updated: 2026-10-18 · Version 2026-10-18-v2 · Lixtara LLC

This Cookie Policy explains how Lixtara LLC ("Lixtara") uses cookies and similar technologies on lixtara.com. Please read it together with our Privacy Policy.

1. What Cookies Are

Cookies are small text files that a website stores in your browser. In this policy we also call similar technologies, such as the browser's local storage, "cookies".

First-party cookies are set by Lixtara; third-party cookies are set by other services. Session cookies are deleted when you close the browser; persistent cookies last for the period shown or until you delete them.

2. How We Use Them

We use necessary cookies so the site works and, only if you accept them, analytics cookies to understand how the site is used and improve it (Section 4). We do not use advertising cookies (Section 6).

3. Strictly Necessary Cookies

Without these cookies you could not sign in, publish your listing or save your cookie choice. That is why they do not depend on the cookie banner.

Name	Provider	Purpose	Duration
sb-<project>-auth-token (may be split into .0, .1)	Lixtara (Supabase Auth)	Keeps you signed in and protects account and listing actions.	Until you sign out or the session expires
lx_consent	Lixtara	Stores your choice in the cookie banner (accept or reject analytics).	365 days
lx_step1_form	Lixtara	Keeps the address and email you typed in step 1 of the listing flow if the submission fails or you sign in, so you don't lose them.	30 minutes
lx_signup_email	Lixtara	Remembers the email you signed up with for the verification-code screen, without putting it in the page address.	1 hour

lixtara_cookie_notice_dismissed (local storage)	Lixtara	Remembers that you closed the cookie notice, so it is not shown on every page.	Until you clear the site's data in your browser

4. Analytics Cookies (only with your consent)

Only if you accept in the cookie banner, we use Google Analytics 4 (loaded through Google Tag Manager), to measure traffic and where visits come from, and Microsoft Clarity, to understand how pages are used through heatmaps and session recordings. If you reject, these tools are not loaded. The events we send ourselves include page addresses without query parameters and never the text you type.

Clarity hides the text and data you type, and we also hide photos, documents and signatures. Your account area (/account) and payment, which Stripe processes on its own pages, are not recorded.

Microsoft no longer publishes the duration of Clarity's cookies; the durations in the table are approximate and are set by Microsoft.

Name	Provider	Purpose	Duration
lx_ft	Lixtara	Stores which campaign or website first brought you here (UTM parameters, no personal data), to measure our campaigns.	90 days
_ga	Google LLC (Google Analytics 4)	Distinguishes visitors for usage statistics.	Up to 2 years (set by Google)
_ga_<container-id>	Google LLC (Google Analytics 4)	Keeps the session state for usage statistics.	Up to 2 years (set by Google)
_clck	Microsoft (Clarity)	Clarity's pseudonymous user ID and preferences for this site.	About 1 year
_clsk	Microsoft (Clarity)	Connects the pages you view into a single session recording.	About 1 day
CLID	Microsoft (Clarity), on Microsoft domains	Identifies the first time Clarity saw this browser on any site that uses Clarity.	About 1 year
MUID	Microsoft, on Microsoft domains	Identifies browsers visiting Microsoft sites. Microsoft sets it on its own domains and uses it for its own purposes, described in its privacy statement. Lixtara does not use it.	About 1 year
ANONCHK	Microsoft, on Microsoft domains	Indicates whether MUID is transferred to another Microsoft cookie used for advertising; Clarity does not use it and the value is always 0.	About 10 minutes

MR	Microsoft, on Microsoft domains	Indicates whether to refresh MUID.	About 7 days
SM	Microsoft, on Microsoft domains	Synchronizes MUID across Microsoft domains.	Session (deleted when you close the browser)

5. Technical Tools Without Cookies

- Sentry (Functional Software, Inc.): error monitoring. It does not use cookies or local storage and is not used for analytics or advertising. When an error happens it sends technical details (error message, page address, browser type) and an anonymous signal per visit to measure site stability. It is configured not to send cookies, form contents or the text you type. Because it is needed to keep the service working, it does not depend on the cookie banner.
- Upstash: rate limits against abuse, applied on our servers. It does not set cookies in your browser.

6. Advertising

We do not use advertising or targeting cookies. Lixtara does not show third-party advertising and does not use cookies to build advertising profiles or follow you across other websites.

If you accept analytics, Microsoft may set cookies on its own domains (Section 4). Microsoft uses them under its own privacy statement; Lixtara does not use them for advertising.

7. Third-Party Services You Open

Some features load from other services, which may set their own cookies under their own policies:

- Stripe, when you pay (on Stripe's pages).
- DocuSign, when you review or sign your agreement (on DocuSign's pages).
- Google Maps, for address autocomplete in the listing flow.
- Mapbox, for maps on property pages.
- Cloudflare Turnstile, for the bot check on forms; Cloudflare may set the cookies it needs for that check.
- The MLS photo servers, when MLS listing photos are shown.

8. How to Choose or Withdraw Consent

When you first visit Lixtara, the cookie banner lets you accept or reject analytics cookies, with both options equally visible. No analytics loads before you accept.

You can change your choice at any time through "Cookie settings" in the site footer. If you withdraw consent, these tools stop loading and the cookies they set on our domain are deleted from your browser. Cookies Microsoft sets on its own domains can only be deleted from your browser.

- You can also view, block or delete cookies in your browser settings.

- If you block necessary cookies, you will not be able to sign in or use the listing flow.

9. Changes to This Policy

We may update this policy when the tools we use change. The version and the "Last updated" date at the top of this page change with each update.
